Julie,

You can see the locations of the Huntington Beach platforms on the attached map.

You can get DMR monitoring data for the platforms from EPA's ECHO database.

Subject: Oil rigs off Huntington Beach

Hi Eugene,

I had a conversation with Robyn yesterday. She mentioned that you might be the person that is aware of the oil rigs off Huntington Beach.

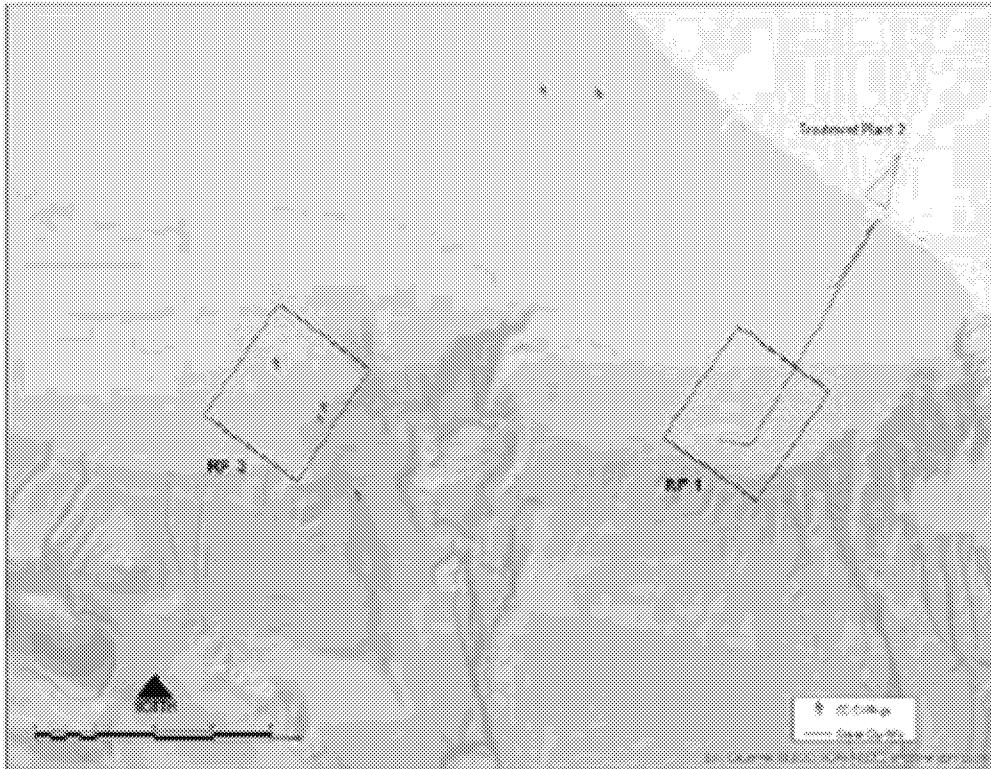

OCSD proposed to change the fish monitoring reference station to the area round the oil rigs off Huntington Beach.

I think that it may not be a true control station due to remobilization of arsenic and selenium.

Robyn said if the platforms are in federal waters, regulated under our offshore oil and gas permit, we may get its discharging monitoring data from you.

OCSD doesn't provide coordinates for this farfield reference station yet. Below is the picture for the reference site (square in blue).

Would you think the data is available?

Thanks,
Julie Song
